ABOUT

I'm a Software Engineering student interested in backend development, infrastructure, system administration and automation. I've experience on both personal and academic projects where I integrated Linux, Docker and Python. I'm looking forward to land a position like Backend or SysAdmin Junior to keep learning in real environment and expand my skill set.

EXPERIENCE

Network and Systems Administration

- Install, maintain, configure and update Linux servers with Proxmox virtualization.
- Deploy projects and services efficiently with Docker.
- Documentation on both Bookstack and GitHub.
- Develop Bash and Crontab Scripts for backup automation.
- Technologies: Proxmox, Linux, Debian, Ubuntu, Docker, Tailscale, Cloudflare, Crontab, Backups, SSH.

PROJECTS

Fobium - web forum

[fobium.com](#)

Anonymus web page to post phobias. My rol in this group project was Backend development and project design and organization. Technologies: Python, FastAPI, Postgres SQL, Docker, Gemini AI, Git/GitHub, Cloudflare, Proxmox, Trello

ToDoList

[todo.ianchenn.com](#)

Website to help organize to-do list with JWT authentication. Technologies: FastAPI, MySQL, Docker, Git, Cloudflare, Proxmox

Led API

[GitHub LED-API repo](#)

Control of LED patterns through custom API and web interface. Technologies: Arduino, Raspberry Pi, FastAPI, C++, Python

Math Blog

[analysis-ii.com](#)

Math blog with exercises and exams resolutions for math-analysis II UBA. Technologies: Github Pages, LaTeX, Google Analytics, Google Search Console

SKILLS

Languages	English, Spanish, Chinese (Mandarin).
Programming	Python, Go, C, Bash, Markdown, LaTeX.
Systems & Tools	Linux (Ubuntu, Debian), Proxmox, Docker, Cloudflare, SSH, Systemd, Cron
Networking	Router configuration, cable management, speed testing.
Other	Project management, Documentation, Code review, Code testing (GO), System installation.

EDUCATION

Software Engineering	University of Buenos Aires FIUBA	
High School	Colegio Nacional de Buenos Aires (CNBA)	(GPA: 8.7/10.0)
